COMPREHENSIVE BENEFITS

CLOUD VIDEO CONFERENCING

Zoom offers HD video, audio and screen-sharing for up to 100 video participants, devices or room systems. With multi-screen, gallery view and voice detection support, you can hold a multi-site video conference with over 80% savings compared to current solutions.

SIMPLE ONLINE MEETINGS

Zoom has all the online meeting features you need – instant or scheduled meetings, screen sharing, remote controls, annotations, host controls, private or group chat and recording – but is also much faster and simpler to use than traditional web conferencing solutions.

MOBILE COLLABORATION

Zoom increases your productivity by giving you similar experiences across desktop, tablet and mobile devices. Our full-feature mobile offering includes start or join, schedule, screen sharing, remote control, group messaging and tablet whiteboarding.

INDUSTRY-LEADING INNOVATIONS

MOBILE SCREEN SHARING & WHITEBOARDING

First real-time whiteboarding for iPad and cloud service with screen sharing for both tablet and mobile devices. Anyone can now screen-share a Dropbox or Box document, a website or photos from an iPhone or iPad without the need for a PC.

ON–PREMISE MEETING CONNECTOR

First cloud service with the ability to run administrative tasks in the public cloud while meeting traffic, including video, voice and data sharing, goes through the private cloud using the on-premise Meeting Connector.

ROOM SYSTEMS INTEGRATION

Easily connect with traditional H.323/SIP room systems and enable them to participate in cloud meetings using the Cloud Room Connector.

SECURITY

Zoom provides a robust set of security features across 5 key elements:
role-based, in-meetings, communications, Meeting and Room Connector and detailed reporting.

	Basic	Pro	Business
