

World's First Software-Defined Video Conference Room System

Industry-Leading Innovation

**Quick Setup**

Simply sync your iPad with your Mac device, and connect your Mac device to your monitor.

Plug in your USB camera and speakerphone.

Install the Zoom Rooms application.

**Seamless Integration**

Zoom integrates with your Google or Microsoft Exchange calendar so you can instantly host or schedule a meeting from your browser.

With Zoom Rooms, see your schedule of upcoming meetings and start your meeting with a single touch on your iPad.

**Meeting Capacity**

Up to 200 interactive video participants or 3,000 webinar viewers can join.

**BYOD**

Supporting "Bring Your Own Device" environments - participants can join from desktops, laptops, mobile devices, telephones, traditional room system and Zoom Rooms.

**Wireless Content Sharing**

Zoom Rooms is the only solution that allows you to share high-resolution content over Wi-Fi or by direct HDMI connection.

Share iOS and Mac devices via AirPlay mirroring

You can even share a video clip with audio.

**Additional Features**

- Personal room ID
- Multi-screen, split view
- Multi-layer security
